PROFESSIONAL SUMMARY

Product Manager with 2+ years at CARS24, owning high-traffic consumer surfaces across the homepage and Orbit SuperApp on mobile and web. Delivered measurable gains in traffic, retention, and operational efficiency through product discovery, experimentation, analytics, server-driven UI, and CMS platforms. Authored an AI Product Management Playbook covering RAG workflows, context engineering, LLM evaluation, and responsible AI product decision-making.

PROFESSIONAL EXPERIENCE

Product Management Associate · CARS24 Nov 2024 – Jun 2026
Gurugram, India · Full-Time · Auto-Tech / E-Commerce

- Spearheaded **CARS24 × Spotify** third-party integration within Orbit SuperApp, launching contextual engagement experiences that drove measurable improvement in **feature adoption** and **user retention** through iterative A/B testing and experimentation.
- Architected homepage revamp using a container model with reusable, **server-driven UI (SDUI) widgets**, enabling **no-code content updates**, improving release velocity, and ensuring product scalability across mobile app and m-site.
- Applied user research and funnel analysis to redesign the end-to-end user journey with contextual CTAs—grew daily active traffic from **4K → 6K users in 30 days** (50% uplift).
- Overhauled Mosaic CMS UX/UI and internal workflow, slashing template launch time from **14 days → 1.4 days (90% reduction)** and lifting internal NPS to **40.8**.
- Designed DLS-compliant universal widget system for no-dev page releases; rationalised **20 widget types / 50 configs → 3 widgets covering 36 configs**, powering all new top-of-funnel (TOF) surfaces on the Cars24 app & m-site.
- Led cross-functional squad (Engineering, Design, Data, Marketing) to optimise Orbit's core features—Service History, Motor Insurance, and FASTag Recharge—driving **41% increase in Monthly Active Users (MAU)**.
- Defined event taxonomy and implemented **Google Analytics 4 (GA4) event tracking** across key product surfaces, enabling data-backed iteration and reducing **time-to-insight** for product decisions.
- Leveraged Snowflake and Tableau to build self-serve analytics dashboards tracking engagement funnels, retention cohorts, and feature adoption KPIs.

Product Intern · CARS24 Jun 2024 – Nov 2024
Gurugram, India · Internship · Auto-Tech

- Authored PRDs, coordinated GTM planning, facilitated UAT, and led post-launch KPI analysis across homepage and Orbit product surfaces; collaborated with UX and Engineering on homepage module redesign to improve engagement and conversion rate optimisation (CRO).
- Contributed to building Orbit (server-driven UI SuperApp)—car owners' price trends, digital document storage, and proactive nudges—achieving **15% retention improvement** in initial rollout phase.
- Built Snowflake and Tableau KPI performance dashboards enabling real-time product monitoring, stakeholder reporting, and data-driven roadmap prioritisation.

SKILLS & TOOLS

Product: Strategy, Roadmapping, PRD Writing, OKRs, RICE/MoSCoW, GTM, CRO, A/B Testing, JTBD	Methodology: Agile, Scrum, Kanban, Sprint Planning, Design Thinking, User Story Mapping
Technical: SDUI, CMS Architecture, APIs, DLS, RAG & LLM Evaluation Foundations, Mobile & m-Site	Analytics: SQL, Snowflake, Python, Tableau, GA4, Excel, Funnel Analysis, Cohort & Retention Analysis
Tools: Figma, FigJam, Figma Make, JIRA, Postman, Confluence, Notion, Google Workspace, Miro	Soft Skills: Cross-Functional Leadership, Stakeholder Management, Data-Driven Decision Making, Ownership

EDUCATION

Bachelor of Computer Applications (BCA) · Swami Vivekanand Subharti University 2018 – 2021
